

career expo

2-3 June 2026

Melbourne Convention and
Exhibition Centre

One-of-a-kind student career and pathway exploration

A dedicated, hands-on career expo for all female and gender-diverse students in Years 7-12 - helping them discover rewarding, well-paid careers in trade and tech industries.

Experience.

Through interactive exhibits, dynamic displays and inspiring presentations, students become part of empowering conversations led by women from a range of highly-skilled fields.

Learn.

Broaden student career ambitions with information about fulfilling, in-demand careers and the range of pathways to get them there.

Discover.

Give students the chance to explore the possibilities available in traditionally male-dominated industries such as agriculture, cloud & robotics, construction, electrical and plumbing, engineering, gaming, pharmaceuticals and many more.

Department
of Education

Open exclusively to female and gender diverse students, the event fosters a welcoming and enthusiastic atmosphere with engaging displays, supportive discussions and an array of career opportunities.

Hosted by the Department of Education, the Trade & Tech Fit expo connects students directly to industry, helping them to consider a wider range of study and employment pathways and broaden their ambitions.

It is the largest event of its kind in Victoria, welcoming over 3,700 female and gender diverse students from more than 140 schools in 2025. Through hands-on workshops, high-tech simulations, expert talks and stimulating conversations with industry professionals, students get direct exposure to economically in-demand industries across STEM and trade sectors.

18 new exhibitors signed on in 2025 alone, focussing on in-demand skills that meet student desires as well as the needs of the Victorian economy.

By realising the wide range of career possibilities available, students can feel empowered to follow their passions into the pathways and work that they really want.

98%

of students who attended said they either may or will be more likely to consider a career in trades or technology.

85%

of student attendees said booths and displays were informative and easy to understand.
