NB: ABS Years 10–12 and 7–12 apparent retention rates refer to Year 12 enrolment of students in full-time school education expressed as a proportion of Year 10/7 enrolments two/five years earlier. DET calculates its retention rate on an FTE basis. Note that apparent retention rates calculated for February are generally higher than for August as a number of Year 12 students leave during the year. The above tables reference the ABS published rates capped to 100 per cent. Capped rates were first published in 2015.

NB: Apparent retention rates by single year (grade) are based on full time students only. Rates are expressed as a percentage of a school education year level that progresses to the next year level. That is, the number of students in a particular year level expressed as a percentage of the cohort of students in the previous year level one year earlier. These rates are akin to transition rates. The above tables reference the ABS published rates capped to 100 per cent. Capped rates were first published in 2015.

Year 12 attainment rates

NB: This is a nationally agreed measure and is sourced from a sample survey. A small movement in the year to year result may not represent a real change but could be due to sampling errors. Therefore, any comparison across time needs to consider the 95% confidence interval associated with the measure.
