

## DET's Acceptability Chart: Used to decide whether the risk is acceptable, based on the rating calculated.

<b>Extreme = Unacceptable</b> <b>(must have Executive oversight)</b>	Immediately consider whether the activity associated with this risk should cease. Any decision to continue exposure to this level of risk should be made at Executive Officer level, be subject to the development of detailed treatments, on-going oversight and high level review.
<b>High = Tolerable</b> <b>(with ongoing management review)</b>	Risk should be reduced by developing treatments. It should be subject to on-going review to ensure controls remain effective, and the benefits balance against the risk. Escalation of this risk to senior levels should occur.
<b>Medium = Tolerable</b> <b>(with frequent risk owner review)</b>	Exposure to the risk may continue, provided it has been appropriately assessed and has been managed to as low as reasonably practicable. It should be subject to frequent review to ensure the risk analysis remains valid and the controls effective. Treatments to reduce the risk can be considered.
<b>Low = Acceptable</b> <b>(with periodic review)</b>	Exposure to this risk is acceptable, but is subject to periodic review to ensure it does not increase and current control effectiveness does not vary.
