There are a range of activities that will help build and maintain students’ wellbeing. The activities cover six key elements that are important to wellbeing. These activities are based on the optional Resilience, Rights and Respectful Relationships teaching and learning materials.

**Six key elements that are important to wellbeing**

- **Emotional literacy**
  Understanding emotions helps students to understand themselves and other people. We can do this by focusing on recognising, expressing and managing emotions. Understanding emotions is key to building empathy and self-awareness.

- **Personal strengths**
  Help to build students’ ability to recognise and understand positive qualities in themselves and others. This will help to build your students’ self-confidence and their capacity to face and manage challenges.

- **Positive coping**
  Provide opportunities for your students to discuss and learn different types of coping strategies. This will increase your students’ ability to manage stress, control impulses and overcome obstacles.

- **Problem solving**
  Students can develop their critical and creative thinking skills to explore different types of problems. This can build your students’ ability to make responsible decisions that consider the likely consequences of different ways of solving problems.

- **Stress management**
  Learn about different calming strategies to deal with stress. This can help your students to cope with challenges they are facing now and in the future.

- **Help seeking**
  In these challenging times, it is important to normalise asking for help. Students will learn to recognise situations in which to seek help, how to identify trusted people in their lives to ask for help and practice asking for and providing help.
