INCLUSIVE EDUCATION EQUIPMENT BOOST FOR SCHOOLS (2018) GUIDANCE
In Term 3, 2018, all Victorian government schools will receive $5,000 in their SRP to invest in specialised equipment and assistive technologies.

On top of this, schools can apply to access more highly specialised equipment and technology through the targeted streams of the Equipment Boost for Schools.

OVERVIEW

In 2018, the Victorian Government is giving schools extra resources, guidance, access to specialist expertise and support to embed inclusive education in all aspects of school life for students with disabilities and additional learning needs.

As part of the Department's Inclusive Education Reform Agenda – Additional Supports Program, schools will receive funding to purchase new specialised equipment and assistive technologies to strengthen whole-of-school inclusive education practice.

The $12 million Equipment Boost for Schools initiative supports inclusive education practices in Victorian government schools through three discrete funding streams:

Flexible
Dedicated funding of $5,000 provided to all schools through the Student Resource Package (SRP) for specialised equipment and assistive technologies to support a review and refresh of school-level inclusive education practice during Term 3, 2018.

Specialised
An opportunity for schools to apply for high-value and/or highly specialised equipment and assistive technologies to meet the needs of individual student(s) or support improvements in whole-of-school inclusive education practice.

Blind and Low Vision
Targeted supports for students who are blind or have low vision through the Statewide Vision Resource Centre (SVRC) Technology Library.

The Equipment Boost for Schools complements and supports the Inclusion Boost funding of $4,800 provided to schools in Term 3, 2018, to support schools to review and refresh inclusive education policies, and identify opportunities for practice improvements.

Schools’ increased awareness of, and reflection on, legislative and policy responsibilities provides an opportunity for impactful decision-making to embed equipment and technologies within high-quality inclusive education practice.

This guidance:

- Outlines the funding arrangements for the three streams
- Provides a recommended process to identify and implement equipment and technologies
- Provides schools with a list of specialised equipment and assistive technologies
- Refers schools to alternative funding programs and related workforce capacity initiatives.

INCLUSIVE EDUCATION REFORM AGENDA

The Inclusive Education Reform Agenda – Additional Supports Program aims to:

- maximise access, participation, achievement and wellbeing in school and early childhood education
- support children and young people with disabilities by providing learning environments that are safe, positive, supportive and suited to their needs
- ensure adequate support for families, education professionals and communities to enable inclusive education.

To read the Education for all policy, see:

School Policy and Advisory Guide – Students with a Disability

For more information about other inclusive education reforms, see:

Inclusive Education for Students with Disabilities
Supporting students with additional learning needs
INCLUSIVE EDUCATION POLICY AND PRACTICE

Inclusive education means that all members of every school community are valued and supported to fully participate, learn, develop and succeed within an inclusive school culture. This includes making reasonable adjustments for students with disabilities and additional learning needs.

Data shows that Victorian schools make adjustments for 19 per cent of students because of a disability or an additional learning need. This would be approximately 115,000 students\(^1\) in Victorian government schools, and this suggests that every government school may receive benefit from specialised equipment and assistive technologies that supports their capacity to deliver inclusive education.

The Equipment Boost for Schools supports Victorian government schools with dedicated funding for specialised equipment and assistive technologies. This comes at a time when schools are asked to review and refresh inclusive education policies and practices via the Inclusion Boost.

Specialised equipment and assistive technology supports inclusive education practice by:

- removing barriers to access to curriculum content
- supporting full participation of students in learning activities
- supporting students to demonstrate knowledge and strengths at assessment
- allowing students with and without disabilities and additional learning needs to participate and learn together in the same classes/environment.

The Equipment Boost for Schools funding model aligns with the SHARE Principles of Inclusive Education. The model provides schools with flexibility to collaborate with students, parents, carers, teachers and support staff to tailor equipment and technology needs to the unique requirements of their school and students in line within these principles.

\[\text{Figure 1. SHARE Principles of Inclusive Education (developed based on feedback captured in 2017 during public consultations on the Department’s Education for All inclusive education policy)}\]

\(^1\) Nationally Consistent Collection of Data for Students with Disabilities, 2017 & Department of Education and Training February School Census, 2017
FUNDING STREAMS

Schools can purchase, or apply to purchase, specialised equipment and assistive technology to support students with a disability or an additional learning need to participate in any aspect of school life.

Funding is not linked to students’ eligibility for other types of disability funding or the Program for Students with Disabilities, which provides schools with supplementary resources for a defined group of students who have disabilities with high needs.

Equipment and technologies can be highly individualised for a particular student or students, or support areas for improvement identified in the review of whole-of-school inclusive school practice.

To determine the appropriate equipment or technologies to support inclusive education, schools should consider factors such as:

- student(s)/student groups who will most benefit from the use of equipment
- outcomes expected from equipment use and whether this is consistent with the school’s goals
- practicality of using and storing within the school setting
- training required to use the equipment appropriately and any additional resources required
- ways in which the school will evaluate the outcome and effectiveness of the equipment enabling students to better meet educational goals and/or in promoting whole-of-school inclusive education.

Purchases under this initiative should reflect collaboration between the school leaders and teachers, parent-guardian/carer(s), students, and specialist education or allied health staff to support agreed understandings and responses to students’ needs.

Figure 2. The Equipment Boost for Schools three-stream initiative in 2018.
SPECIALISED EQUIPMENT AND ASSISTIVE TECHNOLOGY

Specialised equipment is any item that supports students, including those with disabilities or additional learning needs, to fully participate, learn, develop and succeed in school and school-related activities. This may include items such as adjustable furniture, mobility resources, portable wheelchair ramps, literacy aids or customised sporting equipment.

Assistive technology is any device or system that allows individuals to perform tasks they would otherwise be unable to do or increases the ease and safety with which tasks can be performed.

The specialised equipment and assistive technology funded under all streams of this initiative must be used primarily within the school, or in school-related activities, to promote inclusive learning environments. The Equipment Boost for Schools provides schools with flexibility to purchase from a range of inclusive education equipment and assistive technologies which will:

- support students to participate in all aspects of school life including co-curricular activities, recreational opportunities and Outside School Hours Care
- improve students’ access to learning and enhanced communication between students and their teachers and peers
- enhance student engagement, independence and agency
- build inclusive school environments where all students are supported to learn together.

All adjustments, interventions and other supports provided to students with disabilities and additional learning needs should be personalised and individualised to address the student’s identified learning needs and build on their strengths. Flexibility is provided to support localised and individualised decision-making for schools’ unique needs considering the resources within the school, staff capability, need for additional training, allocation of resources and developing new programs or systems.

Equipment and technology can be used in schools to support students at a functional level (to access content), a participatory level (to interact and engage with other students and teaching approaches) or a pedagogical level (to grow as self-directed learners).

It is important that schools consider where purchased items can be incorporated within usual practices, or where usual practices can be adapted using equipment and technologies, to develop new ‘norms’ that are more inclusive for all students.

IMPLEMENTATION RESOURCES

The Department has developed comprehensive resources to support schools to implement the Equipment Boost for Schools. This includes:

- a recommended process to identify and implement equipment and technologies provided to support school-level decision-making
- a list of specialised equipment and assistive technologies used to support Victorian government school students as collated with support of allied health professional peak bodies and regional, area and school based support staff.

Supporting materials are not intended to be exhaustive. Materials provided aid schools to maximise their investments, implement equipment and technologies effectively and to identify examples of purchases within scope of the initiative.

For the Equipment Boost for Schools Implementation Resources, see: www.education.vic.gov.au/school/teachers/learningneeds/Pages/equipmentforschools.aspx
PRINCIPLES AND SCOPE

While schools have the flexibility to make purchases that best suit the needs of their student(s), the following principles must apply:

- Funding is only for new specialised equipment and assistive technologies
- Purchases must be:
  - directly supporting inclusive education practice within the school or in school-related activities
  - expended in terms 3 and 4, 2018
  - consistent with the Victorian SHARE Principles for Inclusive Education
    (Student centred, Human rights focused, Acknowledges strengths, Respects legal obligations and Evidence-based)
  - within the scope of the initiative as described within this guidance.

</table>
FLEXIBLE FUNDING

In Term 3, 2018, all Victorian government schools will receive a one-off $5,000 cash allocation identified through the SRP Targeted Initiative line ‘Inclusive Education Equipment Boost’. Schools can view this funding in the Budget Details Report and Budget Management Report.

School business managers are advised to use the new ‘Inclusive Education’ Sub Program code 5220 in the schools Chart of Accounts to report their Equipment Boost for Schools financial transactions in CASES21 by the end of term 4, 2018.

All expenditure of Equipment Boost for Schools funding must be in line with guidance within this document.

As part of the Department’s evaluation, a selection of schools will be asked to demonstrate implementation of the equipment and technologies under the initiative. These schools will provide information on their school’s approach to using Equipment Boost for Schools funding. The Department’s Inclusive Education Grants team will be in contact with selected schools directly in terms 3 and 4.

SPECIALISED STREAM

Schools that identify a higher level of need that cannot be serviced via the SRP can submit an application for funding to purchase high-value and/or highly specialised equipment and assistive technologies that will have a profound impact on students’ participation, learning and success at school.

Teachers and other support staff may recommend assistive technology as a reasonable adjustment for students with a disability to access and participate in the curriculum, classroom learning activities, school-related activities and the educational environment. Specialist staff, including occupational therapists, physiotherapists, speech-language pathologists, psychologists, social workers and visiting teachers, may assist with assessing students’ needs and recommending appropriate items. Consultation with families is an important part of this process.

All applications must include endorsement of the school's principal prior to lodgement.

Eligibility

All Victorian government schools are eligible to apply for:

- highly specialised equipment or assistive technologies to support individual student(s)
- high-value specialised equipment or assistive technologies to be embedded in whole-of-school approaches to inclusive education.
SPECIALISED STREAM

How to apply
- Applications open 17 July 2018 and close 7 September 2018
- Applications must be submitted online at https://inclusiveedgrants.smartygrants.com.au
- Incomplete or late applications will not be considered
- Applications must be accompanied by an itemised quote(s)
- Applications must include school principal endorsement
- Changes to applications can occur until applications are submitted
- Additional supporting documentation can be uploaded with the online application.

Following an assessment process, the Department will notify schools of their application outcome by early Term 4, 2018. This will allow schools that are successful in their application sufficient time to purchase equipment and apply for reimbursement via the Schools Targeted Funding Portal during Term 4, 2018. Schools with successful applications will be supported to make reimbursements through the portal and guided through this process as needed.

Applications
Applications must state:
- the need or improvement the specialised equipment or assistive technology is intended to address
- how this need or improvement was identified
- how the requested equipment was identified as the most suitable solution to address the identified need, including details of any alternative options that were considered and why they were not deemed to be suitable
- the expected impact/benefit of integrating the requested equipment into the school’s teaching and learning process, including the expected benefit to student(s) who have a disability or an additional learning need
- other funding sources that have been considered
- the alternative should funding not be approved
- any staff training that is necessary for the equipment to be effectively integrated into the school’s teaching and learning programs.

Support for applications (encouraged)
To strengthen applications, schools are strongly encouraged to provide supporting documentation where possible. For example, this may include:
- professional advice or assessments by a clinician or allied health professionals (for example, clinical assessments/recommendations in relation to the student’s needs)
- supporting advice or recommendations from specialist staff (for example, occupational therapists, physiotherapists, speech-language pathologists, psychologists, social workers and visiting teachers assisting with identifying and assessing students’ needs and recommending appropriate items)
- evidence that the requested equipment has had a positive impact in other schools
- results of pilot programs or trials of the requested equipment in similar contexts
- academic research.
SPECIALISED STREAM

Funding priorities
Priority is given to applications:

- that best demonstrate that the requested equipment or technology addresses an identified need within the school and will have a profound impact on students’ participation and learning at school
- where requested equipment or technology provides a substantial or extensive adjustment to students’ access and participation in education on the same basis as students without disability
- that best demonstrate the expected impact of the requested equipment or technology
- that represent value for money and add value to existing supports.

Ongoing management of equipment
Schools should note that:

- purchasing must follow schools’ purchasing, insurance and taxation policies
- equipment and technologies will be the property of the school and must be managed in compliance with relevant asset recording and control policies
- all repairs, maintenance, transfer, storage and disposal of equipment are to be maintained by the school within existing resources, policies and practices noting specialised stream funding applications can include extended warranty and maintenance costs for new equipment and technologies
- ongoing management of all equipment and technologies must be in compliance with relevant Department policies.

BLIND AND LOW VISION STREAM

The Department’s Statewide Vision Resource Centre (SVRC) provides supports, including the provision of a range of technology options, for students who are blind or have low vision through its Technology Library. SVRC procures items to be part of this lending library, based on the identified demand from schools.

Through the Equipment Boost for Schools, the SVRC will receive additional funding to continue, and expand, support for students who are blind or have low vision in Victorian government schools. This replaces the annual Equipment Grants previously provided to schools to purchase essential equipment for students with vision impairments not supported through any category of the Program for Students with Disabilities.

Eligibility for SVRC additional supports is established through the Educational Vision Assessment Clinic (EVAC), run jointly by the Department and the Royal Victorian Eye and Ear Hospital.

Separate guidance is provided to access equipment and technology through the Blind and Low Vision Technology Library.

Applications open 17 July 2018 and close 17 August 2018.
OTHER RELATED FUNDING

There are a range of policies, programs and resources for schools to support the delivery of high-quality schooling for all students, inclusive of students with disabilities and additional learning needs. These resources are provided by the Department in the SRP, through student support services, or through early identification and intervention programs. There are also other state and commonwealth programs that provide funding for specialised equipment and assistive technologies.

**Australian Hearing** provides services under the Australian Government Hearing Services Program for children and young Australians with permanent or long-term hearing loss. This support includes selecting and fitting hearing devices as well as additional assistance to clients with complex communication needs (access to higher level technology and devices in addition to hearing aids).

**Accessible Buildings Program** covers the costs of infrastructure upgrades to provide access to education facilities for students, parents and staff members with a disability.

**Employment Assistance Fund** gives financial help to eligible people with a disability or mental health condition and employers to buy work-related modifications and services. The commonwealth funding is available for staff that require modifications to access their school. Schools can also apply for funding directly to provide teachers and staff with disabilities with support, equipment and technologies.

**Inclusive Schools Fund** provides Victorian government schools with quality new spaces and more inclusive facilities based on best practice research and design. Schools are able to apply to the fund for innovative building projects that improve participation and learning outcomes for students with disabilities.

**Language and Learning Disabilities Support Program** provides schools with resources to support the delivery of teaching and learning programs for students with autism, dyslexia, language or other learning disabilities and can be used for specialist equipment or materials.

**National Disability Insurance Scheme (NDIS)** provides all Australians under the age of 65 who have a permanent and significant disability with the reasonable and necessary supports they need to enjoy an ordinary life. The NDIS funds supports that are associated with the functional impact of the student’s disability on their daily living activities (those not primarily relating to education attainment) including personal care and support, transport to and from school, and specialist transition supports to and from school to further education, training or employment.

**Program for Students with Disabilities** provides a range of supports and initiatives to assist government school students with disabilities including resourcing for eligible students which assists schools to meet their obligations under the Disability Discrimination Act. Supports can include funding for the provision of specialist staff (for example, special needs coordinator, occupational therapists, and speech pathologists); teacher professional learning; specialist equipment/materials; and education support staff.

**State-wide Equipment Program (SWEP)** is a subdivision of Ballarat Health Services that oversees a number of different assistive technology programs. SWEP provides Victorian people who either have a permanent or long-term disability, or are frail aged, with subsidised aids, equipment and home and vehicle modifications to enhance their independence and facilitate community participation.
RELATED WORKFORCE CAPACITY INITIATIVES

There is a range of existing workforce capacity strategies and supports to help schools understand their obligations and responsibilities to provide inclusive learning environments.

Legal obligations

Education and training providers must be aware of their obligations under disability discrimination legislation. In broad terms, the Equal Opportunity Act 2010 (Vic) and the Disability Discrimination Act 1992 (Cth) and the Disability Standards for Education 2005 (Cth) state that it is unlawful to discriminate against a student on the basis of their disability. This legislation also states that schools are required to provide students with disabilities with reasonable adjustments, so that they can participate in their education on the same basis as other students.

Schools have Legal Obligations and must comply with Disability Standards for all students with disabilities, not just those who are eligible for support under targeted funding programs.

Additional resources provided to schools, including the Equipment Boost for Schools, do not define or limit the support to be provided for students with disabilities or additional needs.

The Disability Standards for Education eLearning modules can help schools and education providers to understand their obligations.

Education for All policy

The Department’s Education for All policy, which was released in December 2017, articulates the Department’s expectations and vision for inclusive education for students with disabilities and additional needs. The Education for All policy and related Additional Supports reform agenda initiatives address recommendations from the Review of the Program for Students with Disabilities.

Inclusion Boost

During Term 3, 2018, all Victorian government schools will undertake a refresh of school-level inclusive education policies and practices under the Inclusion Boost initiative. The Equipment Boost for Schools funding has a direct relationship with this review, in particular by increasing the awareness, understanding and focus on commonwealth and state legal obligations to all students with disabilities and additional learning needs, not just those eligible for targeted funding.

Inclusive Education Scholarships

From 2018 to 2022, Inclusive Education scholarships are available to strengthen the capacity of teachers, schools, and regions to provide high-quality inclusive education. Victorian government teachers and regional allied health professionals can apply to undertake postgraduate studies in Special Education and Applied Behaviour Analysis.

Inclusion Online

The Inclusion Online learning portal offers teachers, principals and allied health staff in Victorian government schools a suite of free online blended professional learning courses.

There are four Inclusion Online courses available in 2018 including Understanding Autism Spectrum Disorder; Understanding Dyslexia and Significant Difficulties in Reading; Inclusion of Students with Speech, Language and Communication Needs; and Understanding Hearing Loss.

Each of the online courses provides up to 20 hours professional learning, including three face-to-face sessions or web-conferenced sessions, spread across 10 weeks. These hours may contribute to teacher registration renewal requirements with the Victorian Institute of Teaching.
