## **STATEMENT OF THE PROBLEM**

*At our school we want to investigate the health habits of our students.*

---

## **HEALTH SURVEY – THE STORY**

### **The Planning Stage**

It was decided that each class would develop their own health survey relating to health issues. Each student in the class designs and administers a health survey appropriate to the level of the target group/audience. Survey analysis of the data can take the following form:

- A graph
- A story
- A news article for the newsletter
- A presentation at assembly
- A letter to a friend
