

## Intel® Teach Elements Courses

...skills, tools and  
resources for every  
21st century teacher

Learn how to use  
ICT effectively with  
your students now

## Intel® Teach Elements

**A series of free, just-in-time professional development courses designed for busy teachers.**

Each of these short, interactive, e-learning courses provides deeper exploration of key 21st century learning concepts and strategies for ICT integration using:

- Animated tutorials and audio dialogues to explain concepts
- Interactive quizzes and knowledge-checking exercises
- Offline action planning activities to apply concepts

**Intel® Teach Elements Courses have been created by teachers for teachers...**

- Manageable, practical professional development for busy teachers
- Flexible delivery format – teachers take online modules and complete action planning where and when it suits them
- User-friendly e-learning content offering easy introduction to online courses
- Online modules and extensive course resources are provided entirely FREE
- Courses are stand-alone and can be undertaken in any order

*Choose from the following three courses*

**Project-Based Approaches** takes a fresh look at how to implement effective project-based learning in today's classrooms, and how to integrate ICT for enhanced learning outcomes.

**Assessment in 21st Century Classrooms** enables teachers to develop and manage innovative, ongoing, student-centred assessment processes, with a strong focus on how to assess 21st century skills.

**Collaboration in the Digital Classroom** shows teachers how, when and where to integrate collaborative online tools into learning activities, developing students' understanding and 21st century skills.

### **Facilitated Intel® Teach Elements Courses**

Facilitated courses promote a deeper experience for teachers and enable teachers' progress to be supported and monitored.
