

Summary of Changes to Victorian VET Student Statistical Collection Guidelines

Executive Summary

This document outlines changes made to the Victorian VET Student Statistical Collection Guidelines - 2021 V1.0 and form part of the Victorian VET Student Statistical Collection Guidelines - 2022 v1.0.

The changes have been made in order to provide:

1. the collection of additional data necessary for the evaluation of contractual compliance and policy settings,
2. a broader scope in collecting data directly related to the monitoring of industry participation in work placements, and
3. a correction to the reporting requirement of 'At School Flag' to ensure accurate reporting.

Overview

The Victorian VET Student Statistical Collection Guidelines (the Guidelines) form a data standard which specifies how training activity should be reported in a consistent manner to the Department. They are compatible with Release 8.0 of the Australian Vocational Education and Training Management Information Statistical Standard (AVETMISS) which are the basis for the annual National VET Provider Collection.

AVETMISS Release 8.0 updates as of August 2018 apply from 2019. Full details on AVETMISS are available at the [NCVER website](#).

Where the Guidelines deviate from AVETMISS, the Department ensures there is a clear rationale behind these changes, alternatives have been assessed and the resultant benefit is weighted against the impact of the change.

Purpose

The purpose of this document is to communicate changes to the Guidelines. This summary document will be published as frequently as necessary. The Guidelines will be published annually but may be more frequent depending on the scope of changes throughout the collection year. Off-cycle changes during the year may result from:

- certain aspects of the Guidelines that are ambiguous, erroneous or require clarification
- scenarios adversely affecting the data integrity of the collection
- ensuring compliance with statutory requirements
- reduce burden of reporting requirements on RTOs.

Audience

Training Providers

All VET training providers need to be familiar with the Guidelines in order to understand the nature of the changes outlined in this Summary of Changes document.

Software developers and data analysts

Software developers, as well as systems personnel and data analysts in larger organisations, should note all changes that refer to the technical detail of the Guidelines. These include the file specifications, business rules and data element dictionary.

Prerequisite

Familiarisation and understanding of the latest version of Victorian VET Student Statistical Collection Guidelines (the Guidelines) as published on SVTS or DET website.

Document structure

This document contains a Change Summary table followed by the sections and categories of the Guidelines which contain changes.

How to use this document
