Questions for learners and teachers

Teachers should be able to explain to the learners:

- **What is to be learnt – the learning intentions?**
- **How the learning intentions are linked to the bigger ideas and understandings that the learners will learn?**
- **How will the students be learning?**
- **How the learning activities are relevant to the success criteria?**
- **How learners will demonstrate their learning – what learners will say, make, write or do with reference to sample assessment tasks?**
- **How this new learning will impact on future learning?**
